## **SECTION IV**

### **DESCRIPTION OF SERVICES**

#### **Background and Objective**

Teachers Service Commission (TSC) is in the process of installing LAN cabling for its county offices to enhance service delivery to the public at its county offices.

The objective of this project is to upgrade Teachers Service Commission (hereafter TSC) LAN in the mentioned counties. The new LAN should be able to support the applications that will be running on it, as per the international stands and thus improved service delivery to TSC clients.

The scope of work to be delivered is designing, installation, testing and Commissioning the LAN plus power connections as per the bills of materials listed in the document for each county, this will be done through the guidance of TSC ICT officers.

Each provider/bidder to provide a draft implementation schedule showing key milestones, target dates, assumptions, constraints and resource allocation within the project schedule. Minimal disruption of business processes if any is desirable and hence a phased approach should be key in planning for the project.

The exercise is expected to commence immediately after the award of tender and the project is estimated to last not more than forty (40) working days. The firm will be required to devise appropriate strategies and a project implementation plan to generate as much information as necessary to accomplish the task within 40 working days of commencement of the project.
